

BRACES BY INJURY:

Wrist Injuries

Wrist and hand injuries frequently occur in people who lead an active lifestyle - most skateboarders, football players, basketball players, and other athletes will experience a sprained wrist or wrist injury during their lifetimes. Shop-Orthopedics carries hundreds of braces specifically designed to help you get back into your active life by immobilizing the wrist or providing hot or cold therapy to it. This helps you heal faster and more comfortably, meaning you can get back to the game sooner.

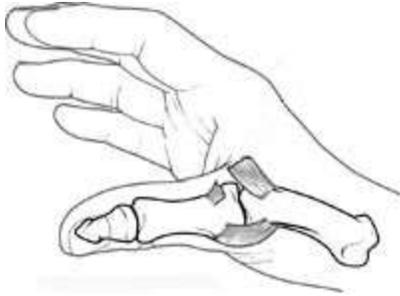

We carry it all; rigid wrist braces that can help prevent injuries or assist in recovery, hot and cold gel pads and wraps that can provide therapeutic remedies to inflammation and swelling, and various compression braces that help relieve pain and help you heal faster

Help Relieve Carpal Tunnel Pain With Our Wrist Braces

Carpal tunnel syndrome is a painful condition caused by repetitive use of the hands and fingers. Swelling in the hand and wrist puts pressure on the median nerve, which leads to symptoms in the wrist such as pain, tingling, or numbness. Pressure on the median nerve can also be caused by a sprain, fracture, or genetic predisposition to swelling in the area.

Relief is at times hard to come by with carpal tunnel syndrome stretching, and exercise may assist . In addition to those methods, you may find some of our options below are a big help. We have some special braces designed for mitigating the pain involved with carpal tunnel. In addition we have braces for heat therapy, cold therapy, compression, and stabilization - all of which can help relieve some of the pain associated with carpal tunnel.

Treat Difficult Thumb Injuries With Our Thumb Splints And Braces

Thumb injuries are hard to treat because they can't simply be wrapped like a wrist or hand. Shop-Orthopedics has many specially designed thumb splints and braces that can help hold your thumb in place and compress it during the healing process.

Whether you suffer from a torn ligament, something like skiers thumb, or a similar thumb condition/injury, there are braces available to help you cope with the condition or injury below. These thumb splints and braces should help you relieve some pain and heal faster, so you can get back to your life with as few hiccups as possible.
